Achieved FDR and estimation calibration
m=1000; K=100 per condition; lambda=0.5; fixed labels. Error bars: approximate 95% Monte Carlo intervals.
mu=1, gamma=0.001
mu=1, gamma=0.01
mu=2, gamma=0.001
mu=2, gamma=0.01
mu=3, gamma=0.001
mu=3, gamma=0.01
False discovery rate
True null proportion (pi0)
Fixed-rule analytic FDR
Fixed p-value threshold: achieved FDR
BH at estimated FDR level: achieved FDR
Mean estimated fixed-rule FDR
